Fischer Fun Mainframe Stuff

April 2015   Tips and Tricks: IOF - Managing Jobs

Here are a few "tips and tricks" that can simplify your review and management of jobs under IOF.

From any ISPF screen, to display all jobs matching the specified job name:

>   =**i.batjob3**

>   =**i.bat***

If your system uses something other than the "I" option to invoke IOF, just specify that option instead of "I":

>   =**x.y.batjob3**

>   =**x.y.bat***

From any IOF display:

To switch to a display of all jobs matching the specified job name:

>   **j batjob3**   5801 Pelican Bay Blvd., Suite 300, Naples, FL 34108

>   **j bat***

To switch to a display of job number 12345:   **job 12345**

To display a selection menu for jobs: **j**

From the *IOF Job Summary* for a job or when browsing the sysout for a job:

>   **ex c/r**   Exit IOF and cancel/release the current job's output

>   **ret c/r**   Return to IOF Job List and cancel/release the current job's output

 Note that you must specify EX (not EXIT) and RET (not RETURN).
