

THE IDENTITY SOLUTION YOU'VE BEEN WAITING FOR

Fischer Identity™ is known world-wide for its flexibility, extensibility, scalability, and... **simplicity**. Complexity is a primary cause of IdM project delays, cost over-runs, and failures. Fischer provides rapid time to value and predictable outcomes by making identity management fast and simple to deploy, operate, and use.

We've incorporated innovations that remove complexity, including an interoperability engine to quickly integrate identity information across on- and off-premise systems, the elimination of programming and its associated cost and error, and pre-built, quality-tested identity components (e.g., workflows, policies, etc.) that work out-of-the-box yet can be easily extended to support your precise needs – no matter how intricate.

Fischer offers the following core identity capabilities. We have flexible pricing and right-sizing choices to tailor a solution to meet your specific business needs and budget.

Protection

Productivity

Compliance

Confidence

Finally, Identity Management for any-sized organization and any procurement model

- Traditional on-premise
- SaaS
- Hosted
- Remotely Managed

Password Reset & Synchronization

Cut your password-reset and help desk costs while keeping users productive by allowing them to quickly reset their forgotten passwords. Strengthen security by automatically enforcing password policies while reducing the number of passwords to remember.

Automated Role & Account Management

Automatically add/change/ revoke user access to IT and physical assets based on real-time business events (e.g., hire, termination, promotion) and self-service requests – all in compliance with your policies. (includes **Self-Service Portal**)

Access Termination

Prevent the cost and brand damage of security breaches by immediately revoking access to customer data, financial information, and other sensitive data.

Privileged Access Management

Avoid security breaches, fraud, and compliance violations resulting from uncontrolled access to Administrative, Super User, Root, Fire Call, and other shared accounts.

Self-Service Portal

Quickly create a streamlined, auditable process for providing and removing user access to IT and physical assets. Provide "day-zero" access to resources and mitigate risk of inappropriate access.

Identity Compliance

Speed and simplify audits and comply with Sarbanes-Oxley, HIPAA, FERPA, Gramm-Leach-Bliley and other regulations. Prove Separation of Duties, recertify access, identify/remediate policy violations, and quickly create reports for auditors.

Fischer Identity™

Turn Identity Management into a Strategic Advantage

To trust your identity solution, you need to first trust your identity solution vendor

Identity Management that Breaks Tradition

Fischer Identity solutions are available in your choice of procurement model: **SaaS, On-Premise, Hosted, and Remotely Managed**. Fischer can guide you in determining which model is best for your organization:

On-Premise

Fully control all aspects of the solution, including the timing of any changes.

Remotely Managed

Leverage Fischer's expert identity operations engineers to maintain and extend your identity solution for you, whether on-premise or remotely hosted.

SaaS

Focus on what's most important for your organization without the distraction of managing another solution.

Hosted

Combine the high availability and SOC 1 Type II environment with the option to perform administration yourself or outsource it to Fischer.

Fischer has been a leader in the enterprise security market since 1982, with scores of innovations and first-to-market products, including the first:

- PC Security Solution rated by the National Security Center (NCSC)
- Windows 95/NT Security Solution
- Meta directory on IBM z/OS
- Holistic, 100% SOA-compliant Identity Management Architecture
- Mobile Password Reset/Synchronization & Provisioning Solution
- Identity Management Architecture Based on Integration Technology
- Provisioning Solution Validated for Oracle / PeopleSoft
- IdM Solution to Natively Enable Cross-Domain Provisioning
- IdM Platform to Support Perpetual, Hosted, and SaaS Procurement Models
- Multi-tenant IdM Solution for the Managed Identity Services® Market
