

Fischer Identity as a Service™ Solutions

Remotely-hosted, secure Managed Identity Services® without the cost or risk of traditional deployments

Overview

The Secure Affordable Way to Outsource Identity Management

FINALLY, IDENTITY MANAGEMENT FOR ANY-SIZED ORGANIZATION

Are you overwhelmed with securing access to corporate assets and managing regulatory compliance, but can't afford the high cost and risk of a traditional identity management (IdM) deployments? Fischer's hosted Identity as a Service™ (IaaS™) solutions enable any-sized organization to quickly achieve the strategic benefits of identity management **without lifting a finger or depleting your budget**.

IaaS™ combines the security, compliance, risk management, and efficiency benefits of identity management with the low cost, predictability, "pay as you go" pricing, and "no software ownership" advantages of the Software-as-a-Service delivery model. Within days, you can begin to audit and control access to resources, enable users to reset their forgotten passwords, enforce compliance policies, generate compliance reports for auditors, and more – all without the massive cost, specialized staff, and multi-year delay you'd expect with a conventional identity management project.

Secure

Low Cost

"Pay As You Go"

Rightsized

Identity Services to Meet Your Business Requirements and Budget

IaaS™ solutions quickly establish standard business and security processes for your people resources, and systems following minimal configuration. **Turnkey services can be rolled-out in as little as one day, while more complex, site-specific business processes can be enabled within one month.**

Password Reset & Synchronization Service

Cut your password-reset and help desk costs while keeping users productive by allowing them to quickly reset their forgotten passwords. Strengthen security by automatically enforcing password policies while reducing the number of passwords to remember.

Access Termination Service

Prevent the cost and brand damage of security breaches by immediately revoking access to customer data, financial information, and other sensitive data.

Role & Account Management Service

Quickly create a streamlined, auditable process for providing and removing user access to IT and physical assets via user self-service requests. Assets may be grouped and viewed however you need: by function, department, or by role to create an effective role-based access control (RBAC) environment.

Automated Role & Account Management Service

Automatically add/change/ revoke user access to IT and physical assets in response to real-time business events (e.g., hire, termination, promotion) and self-service requests – all in compliance with your policies. (includes Role & Account Management Service)

Privileged Account Access Service

Avoid security breaches, fraud, and compliance violations resulting from uncontrolled access to Administrative, Super User, Root, Fire Call, and other shared accounts.

Identity Compliance Service

Speed and simplify audits with an automated user access control framework for complying with Sarbanes-Oxley, HIPAA, Gramm-Leach-Bliley, FERC, and other regulations. Prove Separation of Duties, identify/remediate policy violations, and quickly create reports for auditors.

Fischer Identity as a Service™ Solutions

Remotely-hosted, secure Managed Identity Services® without the cost or risk of traditional deployments

LEVERAGE THE BENEFITS OF OUTSOURCING IDENTITY MANAGEMENT

Do you really want to own software, especially software that's not core to your business?

We didn't think so. Fischer provides robust, secure, and affordable identity management services through the cloud so you can obtain all the benefits while letting us do the heavy lifting.

Strategic Advantages of Identity as a Service™

- Predictable costs year over year
- Right-sized services: pay for only the services you use
- Better results: specify business outcomes in Service Level Agreements
- Obtain value in days, not months
- Reduce staffing requirements while gaining access to specialized skills
- Quickly respond to change: add/scale services for people and systems as needed
- "Do more with less"
- Reduce capital expenditures
- Focus on core business issues and mission critical projects
- Mitigate the risk of technology selection: avoid the cost/risk of IdM deployment
- Utilize identity metrics to monitor cost savings
- Migrate to on-premise implementation should your sourcing strategy change

Security is a key concern in any outsourcing relationship. Fischer assures that your data:

- Resides only in our secure 24/7/365 data centers located in the United States
- Has strong encryption methods applied when traversing the cloud
- Can reside in an auditor-attested SAS 70 Type II environment (*additional fee may apply*)

Additional security best practices include:

- Policy-based security defines and controls the operations available to each user and administrator
- Never stores end-user passwords for accounts on connected systems
- No Fischer personnel need to know your administrative passwords for connected systems
- All transactions actions are audited

**Fischer:
Trusted Data Security
for More Than 25 Years**
