

### iFly™ – Mobile Identity Management Empower the Mobile Workforce – Securely.

#### Do your mobile workers have the tools they require?

According to IDC, roughly two-thirds of all U.S. workers will be mobile in 2007. Fischer's iFly is the only mobile Identity Management solution available on the market. Road-warriors, healthcare professionals, and all other mobile workers now have secure and controlled access to the tools they need to keep business processes moving: provisioning approvals, password management, email, calendar, personal contacts, and enterprise directory information – all via their PDAs.

#### Travel wherever you need, without losing touch!

iFly provides end-to-end encryption over public service providers or WiFi connections around the globe. Remote synchronization ensures that workers have access to up-to-date information, and eliminates cradles or trips to the office just to synch-up. Additionally, iFly is an inherent component of Fischer's Global Identity Architecture™, opening your mobile business processes to the advantages Fischer Identity Suite including centralized administration, compliance, provisioning approvals, password management, and more.

- Provisioning Approvals
- Compliance
- Password Resets
- Synchronization
- Secure Connectivity

### Fischer iFly™ Mobile Self Service The World's Only Mobile Identity Management Solution

---

### **iFly to Comply: Approve Provisioning Requests:**

- Improve compliance: ensure that the right persons approve provisioning requests, no matter where they are
- Respond to requests with full functionality: approve, deny, change, or escalate
- Automatically audit all iFly events in a centralized audit data base
- Keep business processes moving without interruption – approve access to critical resources from any location, anytime

### **iFly to Manage Passwords:**

- Reduce help desk costs: eliminate calls from mobile workers to reset forgotten passwords
- Empower users to easily change their passwords across the enterprise from anywhere

### **iFly to Stay in Touch:**

- Access email for productivity on-the-go
- Synchronize personal appointments and download other calendar events
- Search the Global Address Book / Identity Directory and quickly download information to personal contacts for current information
- Bi-directionally synchronize personal contacts to keep in touch with colleagues, friends and others. Quickly move contacts to new devices

### **iFly to Reduce Costs:**

- Secure mobile connectivity improves productivity and speeds business processes
- Password reset and synchronization reduce costs and improve productivity by reducing help desk calls
- iFly delivers more features and lower TCO than other mobile offerings

### **iFly Supports Your Requirements:**

- Palm, Pocket PC or Blackberry
- Microsoft Exchange, Microsoft Outlook, or Lotus Notes
