

Fischer InterPost™

Instantaneous communication and collaboration have become competitive necessities to reducing costs and strengthening value chains by establishing closer electronic ties with partners and customers. But providing Notes or Exchange to everyone is costly while POP and IMAP don't provide the features required.

Fischer InterPost is the only cost-effective alternative to extend messaging, calendaring and identity management features to employees, contractors and partners across intranets and extranets. It delivers all the features needed by most users at a small fraction of the cost of Microsoft Exchange or Lotus Notes.

InterPost Features:

Email

Access email via browser, Internet clients and mobile PDAs.

Enterprise Calendar

Schedule meetings with people and resources, such as rooms and equipment, across the enterprise.

Electronic Forms

Use forms created in InterPost or TAO to aid productivity.

Public Folders

Groups of users can easily collaborate through shared public folders that can be restricted to specific users.

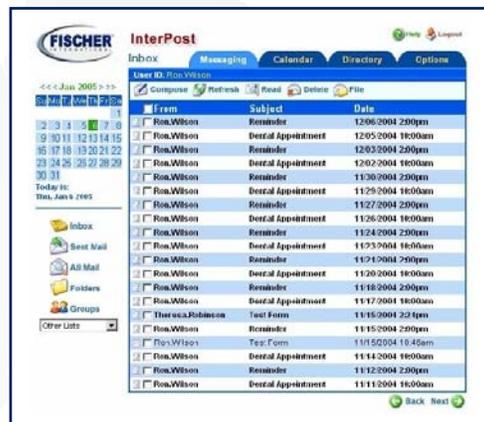

Personal Folders

Users easily keep themselves organized with personal folders.

Fischer Identity

InterPost is the only messaging and scheduling solution to natively include identity management. Fischer Identity is part of Fischer's comprehensive identity management suite. At Fischer, Your Identity is Our Business.™

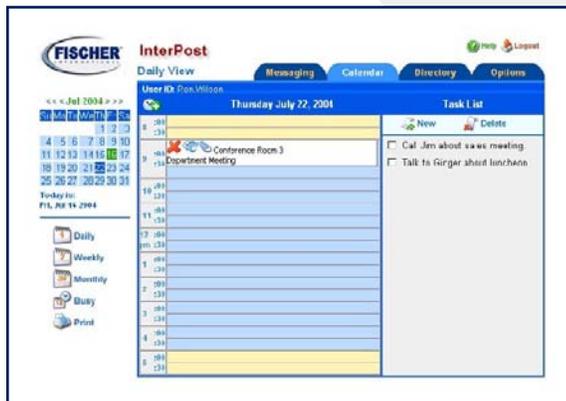

- User Self-Service Users can quickly update their own information.
- White Pages Personalized interfaces enable users to search integrated identity information via web and mobile devices.
- Organization Charts Users quickly find the resources they require in a graphical depiction of organizational structure.
- Contact Management Virtual address book enables users to access current identity information and to keep their mobile devices in sync.
- Delegated Administration Data changes can be securely and accurately accomplished as closely as possible to end-users.
- Dynamic Groups Managing public email lists can be automated by synchronizing changes from HR and other systems.
- Brandable User Interface Easily change logos and even the look of some pages.
- Fast and Easy to Implement Advanced technology sets the standard for time to value and TCO.

**InterPost Provides
An Intuitive User Interface**

Fischer InterPost empowers users to easily share information wherever they are. It's the only groupware facility that's virus-free and natively integrates an identity management solution and a brandable interface.

Optional Features:

iFly™ Mobile Access

Work virtually anywhere. iFly empowers InterPost, Exchange and Notes users to access and update email, calendar and contact information using their PDAs.

Fischer Password Manager

Users securely reset and change their own passwords. Virtually eliminates calls to the help desk for password resets.

Fischer Provisioning

Assures new users have access to resources on day one. Former employees are no longer a threat with real-time denial of access upon termination.

The Fischer InterPost Difference

Reliability

Fischer InterPost has proven, unparalleled reliability among enterprise email and calendar systems. It has also never been infected by a virus.

Scalability

Some organizations support more than 100,000 users with a single server.

Connectivity

Users connect from virtually anywhere.

Control

InterPost has the administrative features required by large organizations at a price that smaller organizations can afford.

Lowest Total Cost of Ownership (TCO)

Provides the lowest total cost of ownership and can be integrated with Exchange or Notes to provide a choice of features and costs for every user.

Fischer International stands behind every solution. Your success is our future.
